

ELECTRICAL VEHICLE TRACTION BATTERY & PLUG-IN-HYBRID ELECTRIC VEHICLE BATTERY

FAMILY CODE: **30544**

The traction battery stores the electrical energy required for the vehicle to work. This energy will be used as “fuel” for the vehicle.

 **NON-EMITTED CO₂*:** *under investigation*

 **MATERIAL SAVINGS*:** *under investigation*

*Source: Life-Cycle Assessment (LCA) Europe. Based on a European study Material savings and non-emitted CO₂ on average compared with the new equivalent MOPAR genuine part. Values are given for information only, corresponding to the main seller of the similar products and determined according to a methodology approved by an independent company (Sphera methodology).

REMANUFACTURING STEPS

- Intensive electrical and electronic tests following the safety standards, identical to the original battery
- Check the power to reach the minimum specification threshold
- Implement the latest software version, ensuring the best performance

MAINTENANCE & REPAIR GUIDELINES

The traction battery must be replaced when:

- It is beyond its useful life or when deemed defective by diagnostics from a certified technician

ADDITIONAL CHECKPOINTS

- Charging cable
