

## GEARBOX HYDRAULIC BLOCK

FAMILY CODE: **30874**

The gearbox hydraulic block is a central component of the automatic gearbox. It regulates the oil pressure and flow. This component allows the gears to be changed and engaged.

NON-EMITTED CO<sub>2</sub>\*: *under investigation*

MATERIAL SAVINGS\*: *under investigation*

\*Source: Life-Cycle Assessment (LCA) Europe.  
Based on a European study Material savings and non-emitted CO<sub>2</sub> on average compared with the new equivalent MOPAR genuine part. Values are given for information only, corresponding to the main seller of the similar products and determined according to a methodology approved by an independent company (Sphera methodology).

### REMANUFACTURING STEPS

- Dismantle, clean and change the valves

### MAINTENANCE & REPAIR GUIDELINES

The gearbox hydraulic block must be replaced when:

- The gears no longer engage or do not engage correctly
- The gearbox temperature is abnormally high

### ADDITIONAL CHECKPOINTS

- Gearbox oil
- Torque converter
