

ENGINE ELECTRICITY

12V BATTERY

FAMILY CODE: **40041**

PRODUCT BENEFITS

The SUSTAINera 12V battery has the same characteristics (starting current, essential with cold weather and capacity to power all the electrical needs of the car) & warranty than Original Equipment. SUSTAINera 12V battery is released with 100% of recycled lead, compliant with new regulation applicable in 2031.

TECHNICAL SPECIFICATIONS

12V recycled batteries are composed of:

- 100% recycled lead
- Polypropylene (PP) - which 30 to 99% of recycled depending the range
- Electrolyte - which 60 to 80% of recycled depending the range

NON-EMITTED CO₂*: Under investigation

MATERIAL SAVINGS*: Under investigation

USE

- A 12V battery enables engine starting and powers all electrical equipment, including lighting, the radio and other accessories.

TERMS OF USE

- 12V batteries characteristics are dimensions (according the car housing), and by charging & starting current.
- The battery must be replaced when car doesn't start or there is no light in the car.

DID YOU KNOW?

- Most, including SUSTAINera range, are "maintenance-free", but there are still some on the market that requires acidity and electrolyte level control.

REGULATIONS

- REGULATION (EU) 2023/1542

RANGE

Recycled 12V batteries are available in a full range of sizes to meet the different engine and technology requirements:

- Diesel and gasoline engines without Stop & Start
- Diesel and gasoline engines with Stop & Start
- Mild hybrid engines
- Full hybrid engines
- Electric engines
